DETAILED ACTION

In the previous Office Action, the Examiner indicated claims 7-9 as reciting patentable subject matter. Applicant amended claims 1 and 7-10 accordingly, and also added new claims 11-15. However, upon further review of the prior art, a new reference has been found that reads on several of these claims. Accordingly, a new Non-Final rejection is set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8, and 10-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hitachi Ltd.

As per claims 1, 4, 10, 11, 13, and 15, Hitachi discloses controlling a compressor to reduce refrigerant flow rate when switching between heating and cooling modes, controlling a four-way valve to reverse the flow direction of refrigerant, and the four-way valve reversing the direction after the flow rate is reduced below predetermined limits (see novelty section of Abstract).

As per claims 2, 3, and 12, Hitachi discloses stopping and restarting the compressor (see paragraphs 0013-0014).

Art Unit: 3744

As per claims 5 and 14, the flow rate of Hitachi is simply reduced for the switching of the four-way valve (to prevent damage to the valve), after which it is returned to normal.

As per claim 6, Hitachi discloses waiting a period of time after the step of reducing flow has elapsed (see for example paragraph 0027, lines 12-13).

Allowable Subject Matter

Claims 8 and 9 are allowed.
